

Recycling maths (KS1)

Put values below the different coloured bins when you have worked them out from the calculations below.

$$\text{Blue bin} + \text{Brown bin} = 5$$

$$\text{Blue bin} + \text{Blue bin} = 6$$

$$\text{Black bin} + \text{Green bin} = 6$$

$$\text{Black bin} + \text{Black bin} + \text{Green bin} = 7$$

$$\text{Black bin} + \text{Black bin} = 20$$

$$\text{Black bin} + \text{Yellow bin} = 16$$

Make up your own calculations by changing the values of the bins. Check they work or test them out on someone else.
